

1949-51 FORD CAR

2017

2017

Sheet Metal, Taillight Lenses, Die Cast Emblems, Weather Stripping & more!

HIGHER QUALITY • LOWER PRICES

Made Right, Fits Right & Last Longer

All of the parts in this catalog, with the exception of new old stock Ford parts, are reproduction or equivalent replacement type parts of Ford Motor Company parts and are represented or referenced by original Ford part numbers.

Reproduction Ford parts made from obsolete Ford tooling that are licensed by but not manufactured by Ford are identified as Classic Parts From Original Tooling.

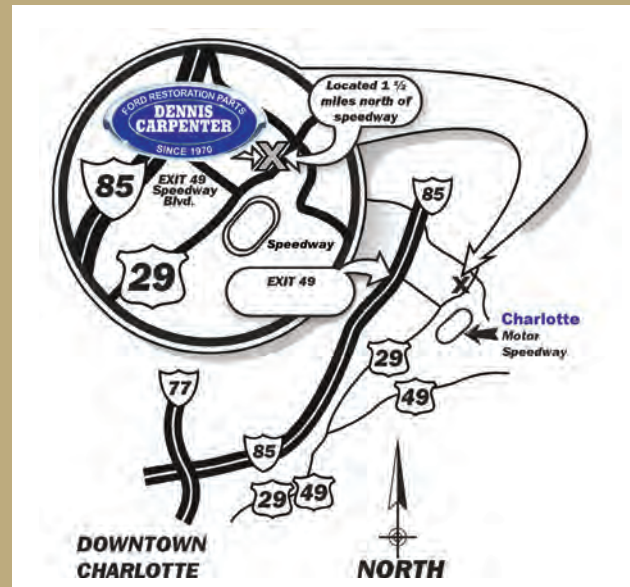

A reproduction part that duplicates a Ford licensed by but not manufactured by Ford is identified as an Official Licensed Product.

CARPENTER SHOWROOM

Be sure to visit our retail showroom in Concord, North Carolina, where you can purchase parts or browse our parts displays. We are located just 1 1/2 miles north of the Charlotte Motor Speedway.

Showroom Hours: **Mon. - Fri. 8am - 5 pm • Sat 9am - 12 noon (EST)**

We attempt to maintain prices as published in the catalog. Due to the fact that we purchase materials from many manufacturers, we are not able to control all product costs. If the supplier goes up, we must raise our prices accordingly. As a result, our prices do change periodically and without notice. Please feel free to contact us for confirmation on current prices.

Errors in typographical content, pricing and imagery are subject to correction and may change without notice. C.I. will not be held liable or responsible if any inaccuracy exists in specifications or pricing. Applications listed in this catalog are based on original factory information. However, variances, will occur due to non-documented substitutions and changes made during the vehicles production.

This catalog supersedes all previous editions, including prices. All rights reserved. No part of this publication may be copied, reproduced, stored in any retrieval system, communicated or transmitted in any form by any means without prior approval.

Carpenter Industries Inc.

Dennis Carpenter Ford Restorations is a manufacturer and retailer of restoration Ford Parts and Accessories. With Dennis Carpenters you can be sure you're getting a part that is made right, fits right and lasts longer at a great price.

Celebrating 47 Years

A look at how
Dennis Carpenter
Ford Restoration Parts
has grown over
the years.

1969

Dennis starts restoration on his 1940 Ford convertible, realizes the need for plastic knobs and convinces an antique car friend into developing tooling for making them. In this photo, Dennis' son Daniel stands beside his dad's disassembled Ford.

1970

Dennis takes extra dash knobs that he made to the Hershey AACA car show and sells out. Realizing that he is able to support his hobby, he continues to develop all dash knobs for 1932-48 Fords.

FIRST BUILDING

Purchased in 1973, it still stands today.

1971

Dennis takes out a 2nd mortgage on his house and buys a bigger injection molding machine for making better quality knobs in larger quantities. He moves his part time business from home into a rented vacant railroad depot.

1972

Dennis realizes that the weatherstripping and seals he purchased for his 1940 had hardened, cracked, and needed replacement after 6 months. He is determined to make premium quality weatherstripping for his 1940. Due to minimum production requirements, he starts selling the extras.

1973

Sales of his quality dash knobs and seals takes off, so he quits his full time job as a purchaser at a local textile plant. He buys a 5,000 sq. ft. building on Hwy 29 in Concord, NC. which is still located in the front of the business today. A late night train derailment forces a rush move into the building.

1974

Dennis purchases 25 acres of land behind his business for \$75,000.

1976

Dennis builds a 10,000 sq. ft. building next to the first one and remembers thinking that he was set for life as far as buildings go. Little did he know that it would eventually grow to be over 300,000 sq. ft.

1977

Dennis purchases two used stamping presses for making stamped metal parts and a used die casting machine for making emblems.

1978

Dennis hires his first tool and die man for making tooling for more new parts. He also purchases his first new Bridgeport milling machine.

1979

Growth of the company continues, and he builds a 25,000 sq. ft. warehouse and showroom that are still in use today.

1987

Because of inconsistent size and hardness of rubber from outside suppliers, Dennis decides to develop his own rubber extruding operation from a desire to offer the very best quality weatherstripping and seals.

Daniel Carpenter and Dennis Carpenter

“Our company’s success is attributed to providing our customers with what they want- **quality products.**”

-DENNIS CARPENTER

2010

Edsel Ford II arrives at Carpenter Industries to tour the facilities.

2011

We transition to a new software and computer system after being on an old unix based system since 1991.

2013

We launch our all new user friendly web store and introduce flat rate shipping to better serve our customers.

1990

Dennis buys more plastic injection machines and develops more plastic parts. He also starts making Cushman Motor Scooter parts in an effort to keep his employees busy in a bad economy.

3001

1993

Ford Motor Company works with Dennis to become the first official Ford licensee for products made with the Ford name or logo on them.

1994

Dennis (the original American picker) fulfills a dream in building a museum to house his long time collection of Fords, Ford memorabilia, Cushman scooters, tractors, and Americana.

1998

Ford Motor Company works with Dennis and his son Daniel on a pilot program to start using the original Ford tooling for parts they were no longer selling.

0001

2000

The Original Ford Tooling program becomes official. We buy bigger machines and build more buildings to take in these large tools and run them. We continue to count it a privilege to have Ford’s trust and now have hundreds of original Ford tools in use. Ford traditionally scraps tools they are finished with. We are honored to save these tools from scrap for continued use, so we can make products for all the restorers out there that need them.

2003

Our biggest warehouse is built with 48,000 sq. ft. of high stack storage.

2005

Daniel Carpenter purchases the company from Dennis on a payment plan. Dennis is now able to focus on his core strength of developing new products and working with the tool makers.

2009

The economic downturn forces us to cut back and examine our ways but not one of our employees is laid off during the whole downturn. We are able to purchase some much needed equipment such as a digitizer and CNC machines at bargain prices from companies that were going out of business during this time.

Dennis still works at the business everyday and enjoys every bit of it. Also, those knobs and weatherstripping he put on his 1940 convertible back in the 1970s are still good to this day.

Preserving FORD History

For Future Generations

Created in 1992, the Early Ford V-8 Foundation is a 501 (c)(3) non-profit, educational organization dedicated to "Preserving 1932-1953 Early Ford V-8 History." This includes all related materials produced by the Ford Motor Company during this period, including cars and trucks. Land has been purchased in Auburn, Indiana, and an 8,000 square foot Phase 1 of our complex has been constructed. We are now raising funds to expand the facility to over 27,000 square feet. Construction began in Spring 2017. Funds for the V-8 Museum come from membership dues and donations from individuals and organizations who realize preserving this period of automotive history is important. As a non-profit corporation, the V-8 Museum can offer tax benefits for donations. Annual dues are \$25 or 3 years for \$60. Membership includes an informative bi-monthly newsletter and free admission to the Museum.

Our on-going "Buy the Foot" Campaign was created to raise funds for the expansion and maintenance of the facility. For \$150 per square foot, a certificate will be issued and your name will be added to a large plaque in the Museum. Purchase of a minimum of nine square feet gets you a custom, pewter license plate topper. Individuals, car clubs, companies and other organizations are encouraged to donate to this campaign and help the Early Ford V-8 Foundation Museum continue its mission of "Preserving Ford History" for future generations.

The future looks bright for the expansion of the Early Ford V-8 Museum. This proposal shows the Ford Rotunda inspired facade.

*7RA-8620-C		- Fits water pump, generator	Early 49	24.95 ea.

Q

These features make our V8 flathead water pumps better

New Pump Housings

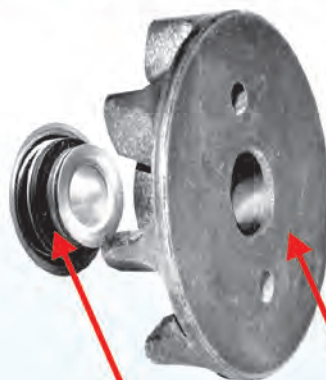

Double Row Sealed Ball Bearings

Our pump housings are new castings (not rebuilds) guaranteeing that there are no coolant-leaking stress cracks. Each housing's mounting surface is machined straight and true ensuring water-tight sealing when mounted to your flathead.

Runs 10° Cooler

An endurance test revealed that a V8 Ford flathead fitted with a pair of our better-flowing water pumps operated with a coolant temperature averaging 155° where as the same engine using stock pumps ran at approximately 165°. This proves that our water pumps produce lower coolant temperatures at idle speed than stock pumps and can ultimately prolong the life of your V8.

Original water pump impeller shafts relied on bronze bushings as bearings and were prone to premature wear. Our new pump shafts spin on double row ball bearings which extends pump life and decreases frictional heat.

Ceramic Seals

Original impeller design creates inadequate coolant flow rate

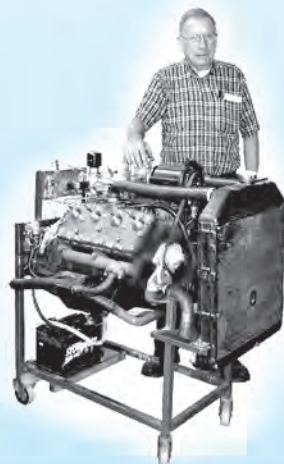

Helical impeller design increases coolant flow rate

Helical Impellers

We've applied the advantages of modern technology to our pumps by introducing ceramic composition seals to the impeller shafts. Ceramic type seals are used in modern day water pumps and have a greater resistance to wear which significantly reduces the possibility of leakage and prolongs the life of the pumps.

We've introduced the efficiency of helical impeller blades to our 1948-1952 water pumps. The angled arrangement of the impeller blades allows the coolant to flow faster through the radiator system at lower rpms. This results in a cooler running engine when operating at idle speed.

This 1940 85 h.p. flathead ran cool for 9 continuous hours for 3 consecutive days using new Dennis Carpenter V8 water pumps.

Water Pumps Engineered To Keep Your Flathead Running Cooler

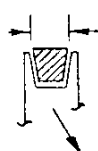

Install Dennis Carpenter water pumps on your classic Ford

**Did you know there is a National Club
for Early Ford V-8 enthusiasts?**

Why not become a member?

Founded in San Leandro, California in 1963, the Early Ford V-8 Club of America recognizes all 1932-1953 Ford Motor Company vehicles including Ford, Lincoln, Mercury, Commercial vehicles, tractors, as well as other Ford powered vehicles built around the world including the 4, 6, 8, and 12-cylinder engines built by the Ford Motor Company.

Today, as the premier marquee club of our represented vehicles with a world-wide membership of over 11,000 and 125 active regional groups, we are dedicated to the restoration and preservation of all 1932 through 1953 Ford Motor Company vehicles.

The club's award winning bi-monthly magazine, the V-8 TIMES, is circulated all over the world and is acclaimed as one of the best car club magazine anywhere.

The V-8 TIMES features technical articles, shop tips, questions and answers to help with your restoration from a panel of experts, nostalgic and historical articles, club and regional

**Celebrating 1932-1953
Ford Vehicles**

group news, offerings of accessories and restoration manuals found nowhere else - plus classified ads on cars and parts.

Traditionally, the Early Ford V-8 Club of America has three National Meets hosted by regional group(s) in the eastern, central and western United States. These provide an excellent opportunity to see some great cars and network with those sharing your love of the 1932-1953 Fords.

Every five years, a Grand National Meet is held. Dearborn, the home of the Ford Motor Company, is usually the site of this meet. In 2008, the 45th Anniversary Meet was held there.

You'll find the most up-to-date information on the club and activities on the club's website. You can also participate in Forums and ask for help with your restorations.

You can also visit our online store for a variety of items including the club's outstanding restoration books highlighting certain model years.

Seat Belt MOUNTING BRACKET

Safety First! Seat belt anchor kits are ideal for reinforcing your mount for all seat belts. Belt anchors reduce the chance of the belt bolt tearing through the floor when the belt is under load. Rounded corners ensure that your belt will not tear from impact or normal use. Ideal for all applications. Hardware included.

MAKE YOUR VENT WINDOWS AIRTIGHT AND LOOKING LIKE NEW

To show how easily you can install new vent window seals in your Ford, Fletchel Little (left), of Harrisburg, NC, volunteered his 1951 convertible for a step-by-step photo demonstration. Jim Lentz performed the project with Fletchel's assistance.

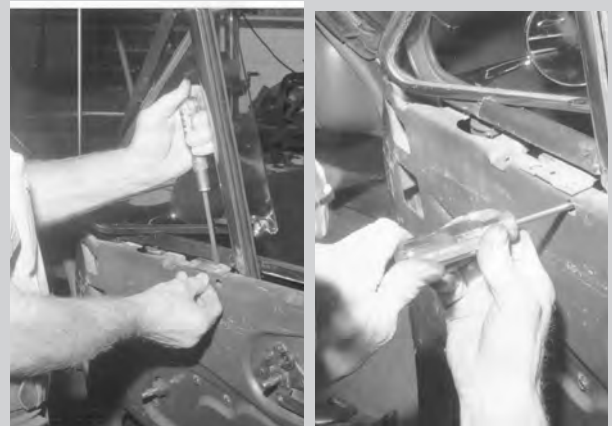

Remove arm rest, door garnish molding, handles and panel. With pliers, remove retainer clip on bolt to window frame and crank lever.

Remove "glass-stop" bolt and clip. Lean window back when removing from door to clear fuzzies.

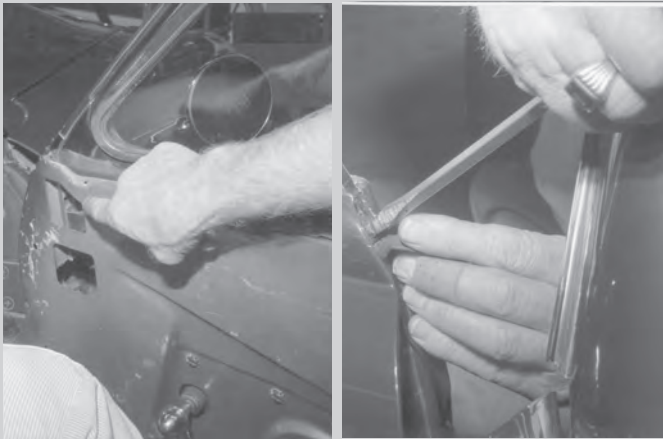

Carefully remove bolt and bracket attached at bottom of the division bar to prevent from falling into bottom of the door.

Remove screws and division bar to door frame.

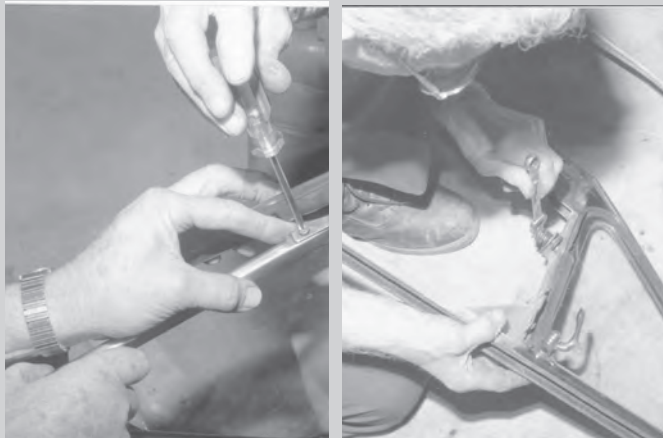

MAKE YOUR VENT WINDOWS AIRTIGHT AND LOOK- ING LIKE NEW

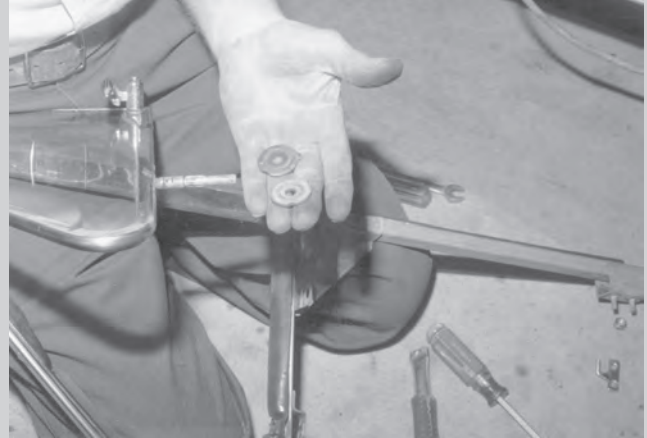

Remove bolt and screw at front of door.

Slowly remove division bar and vent window assembly from the door.

On bench, remove screws in hinge of vent window. With a wrench, remove the nut on the anchoring post of the window to release springs.

IMPORTANT! Notches and tabs on washers must be replaced in exact positions as when removed. Then remove vent window from frame.

With electric drill, remove rivets fastening the old vent window rubber seal to the top and the bottom of the frame.

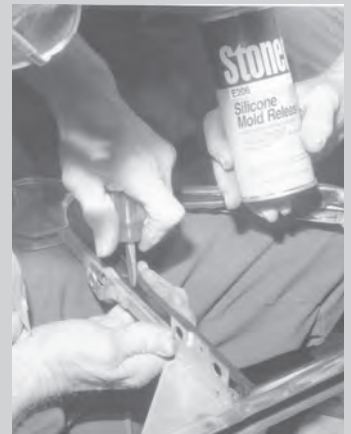

IMPORTANT! When drilling out rivets, save rivet sleeves for reuse.

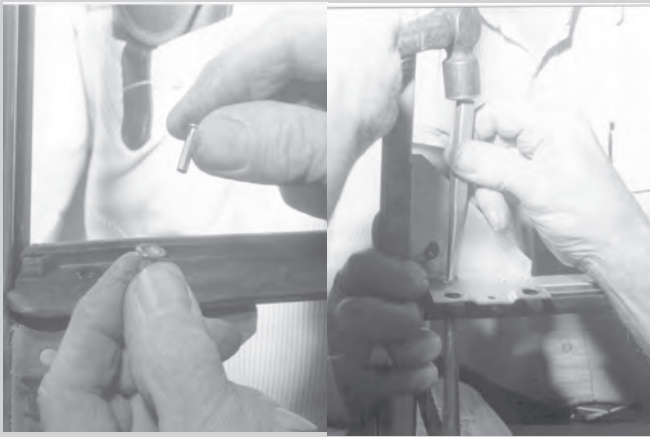

MAKE YOUR VENT WINDOWS AIRTIGHT AND LOOK- ING LIKE NEW

Remove old rubber vent window seal from frame by hand.

Install new vent window rubber seal using silicone spray and small screw driver. Be sure to set firmly in grooves.

Insert new rivets within original sleeves.

Jim prepares to install the newly restored vent window in door repeating steps from number 6 back to number 1.

Jim checks to make sure window is properly adjusted for a tight, weatherproof fit.
